

**ES Ergo-Synchron®**

The **Ergo-Synchron®** seat feature allows a bio-dynamic seated posture and has a backrest **opening angle** of **132°**. It features both seat-depth adjustment and seat-tilt adjustment as standard. As a result, it can also be **used universally** at all workplaces.

**Features**

Standard: Synchronised movement can be locked in a **number of positions**. Backrest opening angle with respect to the seat 132°.

Standard: **Side-mounted spring-force adjustment** (using crank) with just a few turns for **easy and infinite adjustment** of the backrest counterpressure **while sitting**.

Standard: **Seat-tilt adjustment**, with a seat tilt of either 0° or -4°.

Standard: **Seat-depth adjustment** using sliding seat (5 cm), can be locked in 5 positions. The seat automatically returns to the basic position at the push of a button.

# FairPlay

**Design:** Martin Ballendat

**Relaxation on the very highest level.** The subtly integrated features relieve the symptoms of physical and mental stress by allowing a bio-dynamic seated posture. The fully upholstered chairs with fine premium leather provide a visibly and perceptibly pleasurable sitting experience. The new open flat steel armrests with leather armpads which automatically adapt to the movement process are real eye-catchers too.
