

#### **SD Syncro®-Dynamic**

The patented **Syncro®-Dynamic** seat feature is particularly recommended for a dynamic seated posture. A particular advantage is the **automatic weight compensation**. After setting the chair only once to a person's body weight (approximately 40 – 125 kg), a noticeably **constant counter-pressure** is achieved in all upper-body postures. This ensures that the user always sits correctly in an **upright seated posture**.

Options such as **infinite locking** of the synchronised movement (using a gas lift), infinite **seat-tilt adjustment** or **automatic seat-depth regulation (Auto-Glide-System)** allow the chair to be **used universally** at all workplaces.

#### **Features**

Standard: Synchronised movement can be **locked in 4 positions**.  
Option: **Infinite locking** (using gas lift) of the synchronised movement.

Standard: **Side-mounted spring-force adjustment** (handwheel) with just a few turns for **easy and infinite adjustment** of the backrest counter-pressure **while sitting**.

Standard: Seat tilt adjustment in two positions (0°/-6°) for TakeOver, Zeta and @Just.

Option: **Infinite seat-tilt adjustment up to -10° (Tilt)**. For an **active dynamic seated posture**.

Option: **Auto-Glide-System = automatic seat-depth regulation** within the synchronised movement process (6,5 cm). In addition, can be locked individually in 7 positions. The seat automatically returns to the basic position at the push of a button.

# Headquarter

**Design:** Michael Kohlhas

**An effective combination** – a classic with a taste of the future. Headquarter impresses with its striking backrest featuring attached cushions covered in fine Lavalina® nappa leather. The rectangular and cubic backrest as well as the wooden shell for the seat is available either in black stained beech or in walnut. The range is the compelling choice thanks to its elegant lines which can be seen again in the matching partner swivel chair.
