

zenon

sedus

Top view or front view, close-up or from a distance: a rectangle that opens the way for individual creativity and everything you need for flexible working. zenon brings clean, geometric shapes into the office world. There are no distractions. A desk stripped of all frills and superfluous detail. Limited to the essential and eminently combinable. The perfect building block for your office architecture. With matching pedestals, sliding top and modesty panel, it offers plenty of space for the creative exchange of ideas and important discussions. The perfect atmosphere for mobile people to work efficiently and to live: laughing, dreaming, relaxing – **Place 2.5**

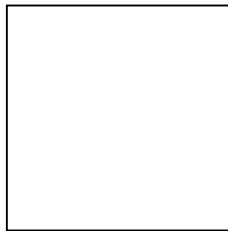

Desk tops. Two elements. Two thicknesses. The compact board, just 12 mm thick, comes in pure white.

The particle board, 25 mm thick, is available in no fewer than 21 finishes – real wood veneer or laminate.

Privacy screen. Work undisturbed: the privacy screen provides versatile protection against prying eyes. The rear surface has an attractive macrohole structure.

Further information and planning data are available to download at: www.sedus.com

Telescopic legs. Versatility creates new possibilities. zenon allows for growth. With a height-adjustable base frame. Infinitely adjustable from 680 mm to 820 mm.

Cross-rails. Stability brings strength; full-width cross-rails see to that. They connect the desk top to base frame, and support the cable dump at the same time.

PC and printer. Nothing gets in the way of your legs. Two steel brackets accommodate your accessories perfectly. PC inside. Printer outside. All neat and tidy.

Sliding top. Simply grip the desk top, give it a brief pull, and it glides forwards. The cable dump is revealed, giving optimal access for arranging your cables. Simple. Flexible.

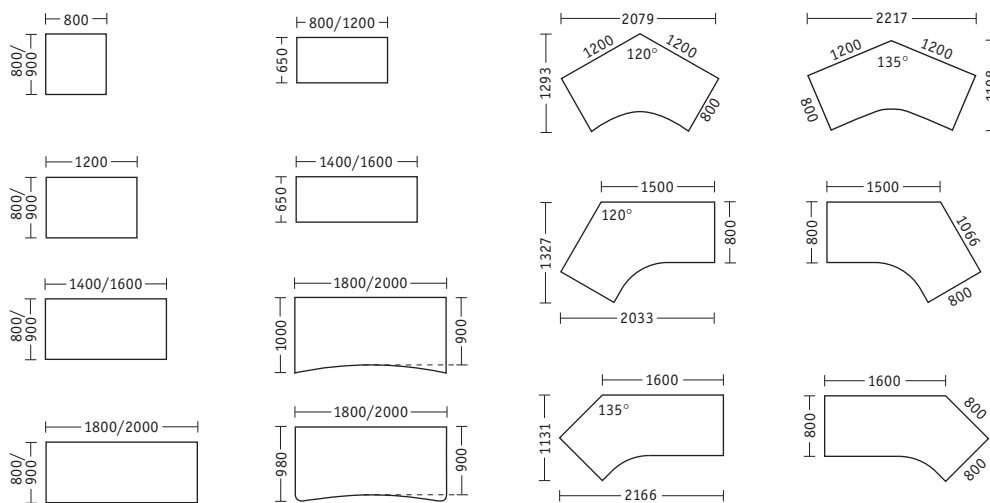

Cable organisation. Horizontal. Cable spaghetti? No thanks! We manage the cables under the desk top,

where they belong. Loose or tied: either way they are all kept together with no tangles.

Cable organisation. Vertical. Being organised makes life that much easier. Here, the cables are neatly bundled on the desk frame.

Vertiflex. Keeping it tidy: the Vertiflex cable organisation system prevents cable clutter. So nothing tangles or gets in the way.
