

early bird

sedus

“Smiling is always in vogue.”
Michael Kläsener, designer

Relaxes the back and facial features.

Smart seating with clear, uncomplicated design is a popular feature in every office. early bird is technically advanced, durable and outstanding in quality. With its welcoming appearance early bird is ideal for smiley people, early risers and other cheerful colleagues.

“Similar” mechanism

The opening angle of 32° allows an almost lying posture. The seat can be inclined forwards 4°. The backrest pressure can be adjusted individually for light and heavy users. Exceptional comfort for anyone who works a lot sitting down.

32° more lying. 100% more thinking.

Sliding seat

The seat depth can be adjusted by 60 mm without the angle of the seat to the backrest changing, guaranteeing the user constant ideal hip support.

Castors

The large diameter of the castors at 65 mm is particularly helpful. The larger rolling radius allows the castors to move more smoothly over carpeting, and take small bumps and other obstacles in their stride.

Sedo-Lift mechanism

Extremely durable and height-adjustable mechanism that is also non-wearing where there is a frequent change of user. Even in the lowest position, the seat-depth springing provides a “soft landing” when you sit down. Compression of the vertebrae is avoided.

One more reason not to be late for work.

Basic armrests

Plastic armrests, comfortable to the touch, generously dimensioned resting surfaces.

3D armrests

Adjustable for height and depth. If pushed forwards, the rests follow a curved path inwards. This gives the user's forearms ideal support at a keyboard.

Backrest with integrated lumbar support

The backrest is available in two versions (height 520 or 590 mm). Its integrated lumbar support is individually adjustable for height by 100 mm. For an exceptional feeling of relaxation while working in a lying posture, a headrest with adjustable height and tilt is available with the large backrest (height 150 mm, width 265 mm).

Four-leg model and cantilever early bird
Distinctive styling: the matching visitor's chairs
for office and conference room.

You can tell a chair by its four legs.
Or maybe not.

Steel frame, chromed or powder-coated in black or white aluminium – also stackable. Available without armrests, with plastic armrests or with leather covering.

**Proportions**

2 backrest heights, adjustable headrest, sliding seat (adjustment range 60 mm).

Headrest

Can be swivelled forwards and adjusted for height to individually suit the size of the user.

“Similar” mechanism

This reaches an opening angle of 32°, the backrest pressure being individually adjustable. A selectable seat tilt of 4° is optionally available.

Sliding seat

Sliding seat adjustable by up to 60 mm without changing the position of the seat.

Seat height adjustment

Sedo-Lift mechanism, gas-lift mechanism.

Lumbar support

To support the lower back, early bird is equipped with a height-adjustable lumbar support.

Armrests

Basic armrests, 3D armrests.

Visual features

10 shades of leather, over 100 covering fabrics, 3 five-star base designs, castors with 65 mm diameter.

early bird. Technology can be this attractive.

Laughter is now available on prescription.
Ask your office furniture retailer.

Where are the upright people? The honest ones, the teamworkers, the unbending? Walking the office floors with a smile in their eyes? As we pass along the corridors, we see more and more stoopers. They go around with drooping shoulders, bowed head and sinister glare. Why? Perhaps because they've been sitting for too long in the wrong posture? After all, the human body is built in the first place for movement. The muscles grow tense, the spine gets twisted. Not exactly an uplifting picture on the X-ray screens of countless orthopaedic specialists. But now there's light at the end of the tunnel, and our mood lifts. early bird – the new freedom in seated work. Inviting you to lean back. Supporting, even encouraging movement. Lifting up your gaze. Bringing a smile to your face. Striking the very words "round shoulders" from the dictionary. Thank you, early bird.
