

# Formo

Discreet and effective.  
Decorative and functional.  
Light and colourful. With Formo acoustic panels, you can create countless compositions while benefitting from the fact that they bring a sound-absorbing surface into your space. No room for unsatisfying compromise. Simplicity, aesthetics and functionality in one.

# Formo

## Wall panels

Thanks to their acoustic properties, a composition of Formo wall panels will effectively reduce the fluttering echo. It will work very well not only in meeting rooms, but also any other sparsely furnished space with large exposed walls.

Formo: nicer, cosier and quieter.

*An arrangement using Formo panels is a great idea for combining acoustic properties with design qualities in a room.*

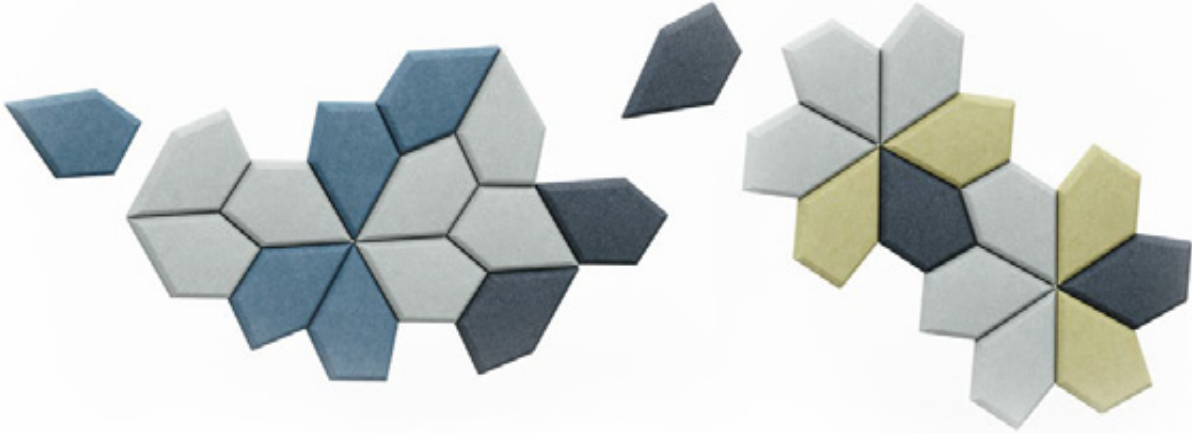

## Curtain

Interesting design and the freedom to create your own compositions from a range of colours, plus a positive impact on the acoustic climate of the room. A beautiful concept that works.
