

MODUS acoustic panels will improve your working environment and workplace well-being by absorbing background noise and by creating acoustically private spaces as well as bringing character to the interior space. The acoustic panel system includes wall panels, ceiling (horizontal) panels, and ceiling (vertical, double-sided) panels.

The panels come in different sizes, as large as 1200x1200mm, and are very easily joined together. The panels contain a special patented and certified material designed to efficiently absorb sound.

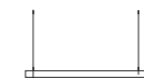

Double-sided (vertical) panels

Wall panels

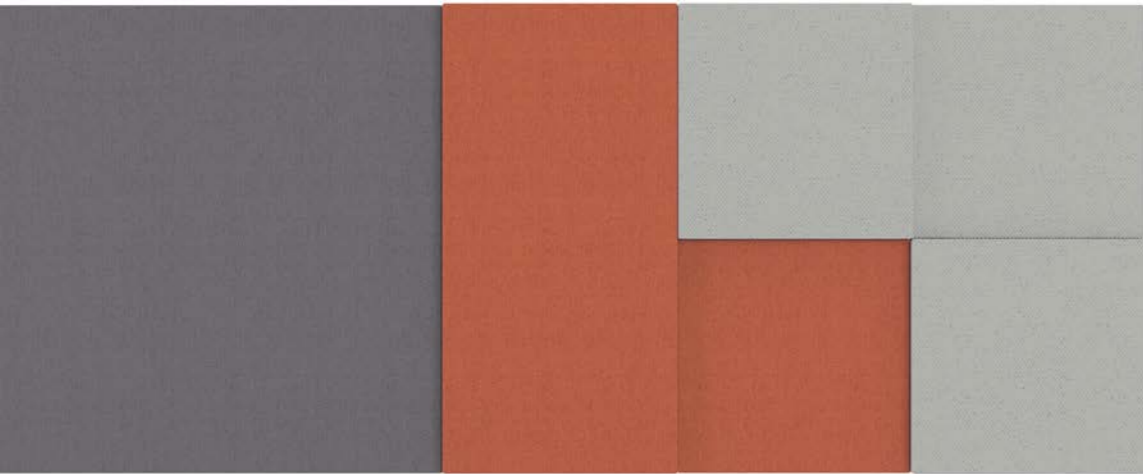

Ceiling (horizontal) panels

You can choose acoustic panels with different fabric colours on each side to create your own unique interior design. Select from from six different sizes and mix and match different panel depths (40 or 70 mm).

MODUS Light

Acoustic comfort in open-plan offices

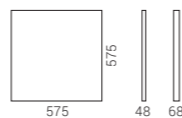

MODUS Light are lightweight, sound-absorbing wall and ceiling panels that improve office acoustics and serve as an inspiring and functional interior solution.

Panels are made of acoustic foam offering class A (for a 68 mm panel) or class C (for a 48 mm panel) sound absorption.

Thanks to their lightweight design, these acoustic panels are easy to transport and easy to install. MODUS Light are available in three design options: wall and ceiling panels, hanging panels, and Armstrong ceiling panels (integrated or hanged on a wire rope). The panels have multiple different fitting options and can be attached to a number of surfaces, even glass.

Implement your creative ideas by using acoustic panels of three different sizes and two different depths. You can also choose from our wide range of fabrics and a variety of colour options.
