Perforated panels

This section includes a graph of sound absorption α_p versus frequency [Hz]. The graph shows two curves: a solid line for 28 mm thickness and a dashed line for 58 mm thickness. To the right, a 400 mm square panel is shown with three thickness options: 28 mm, 58 mm, and 88 mm. Icons represent 'High tones' (a smartphone) and 'Low tones' (a printer), with 'Mid tones' (a person) also indicated.
