

# Street

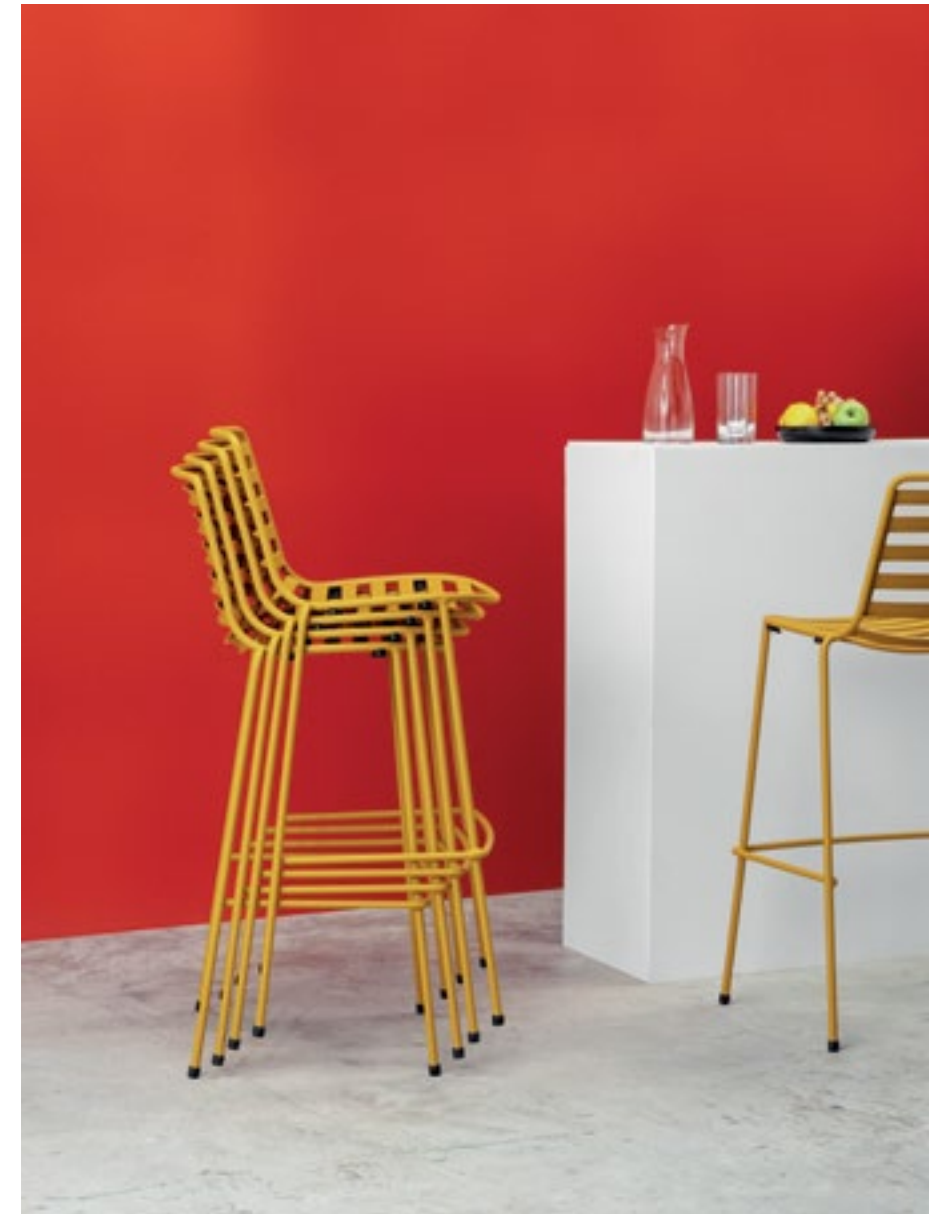

---

The Street range elevates fundamental outdoor seating by combining design prowess with engineering innovation. Unique techniques in tubular steel shaping allows Street chairs and stools to endure any outdoor conditions while being minimalist, sleek and contemporary, setting a new standard in exterior furniture design.

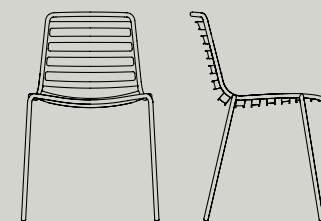

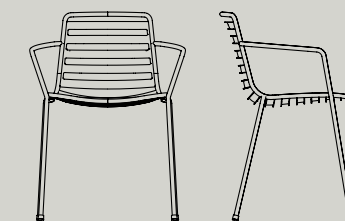

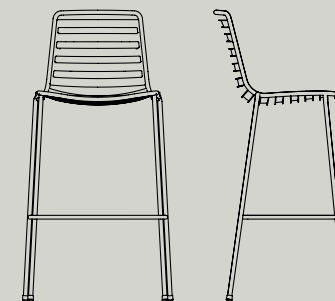

Street chairs and stools are moulded in ergonomic tubular steel, curved in 3D for seamless, with chairs now offering optional integrated moulded steel armrests. Both Street models are available with bespoke cushioning, and in durable custom colour lacquers. Innovative engineered steel makes Street chairs extremely stackable.
